### Gender Terminology: UN Women Resources on the use of gender-inclusive language

As the global champion for women and girls, UN Women recognises the importance of language in fighting gender bias and promotes the use of gender-inclusive language in all contexts and at all times.

Gender-inclusive language refers to language that places both women and men at the same level, and which does not convey gender stereotypes. Learn more here:

<https://www.unwomen.org/en/digital-library/genderterm>

### What is gender-responsive budgeting?

A **gender-responsive budget (GRB)** is a budget that works for everyone (women and men, girls and boys) by ensuring gender-equitable distribution of resources and by contributing to equal opportunities for all. Gender-responsive budgeting is essential both for gender justice and for fiscal justice. GRB is a tool that governments can use to identify and fund measures that close gender gaps.

## Comment from Leigh Ellwood-Brown on CSW69:

We welcome you to CSW69 as a member of the SI delegation, we are 100+ strong, being one of the larger non-government organisation (NGO), delegations attending the Commission of the Status of Women session in New York. Together we can make a tremendous IMPACT!

We have put together this SI Advocacy Resource Pack and a separate SI Delegation Handbook for logistics in New York. We greatly value your constructive feedback as we continuously refine these resources to ensure they are effective tools that truly support you during this delegation.

From the latest 'UN Women Gender Snapshot Annual Report 2024' this resounding message is written - "Gender Equality is good for people, planet and peace, and investing in women and gender equality is urgent. If we don't it will cost us." "As the world gears up to mark the 30<sup>th</sup> Anniversary of the visionary Beijing Declaration and Platform for Action - the blueprint for women's and girls' rights adopted by 189 governments in 1995, here are some key takeaways from the Gender Snapshot report -

1. The economic Cost of gender inequality: The world is missing out on \$10 trillion every year by not investing in women's rights
2. With the right policies and investments, achieving equality is within reach, and there is evidence that it makes for a better world and healthier economies.
3. Progress on gender equality globally is too slow to achieve SDG5 and the Sustainable Development Goals.
4. Six investment priorities to unlock change, read more details below:

[Progress on women's rights and the Sustainable Development Goals - Takeaways from UN Women's Gender Snapshot 2024 | UN Women - Headquarters](#)

Share and make your voice count: Investing in Gender Equality is about achieving a world where all women and girls are empowered and can enjoy their human rights. Utilise the resources within this document; be familiar and become **a catalyst for change - a Soroptimist CHANGE Maker!!**

**Where is gender equality after three decades? Are you impatient for this to happen like I am! - Advocate your own Nation for Change and implementation!**
